Owner's manual - (English, Portuguese, Spanish) User care Dyson DC23 CANISTER VACUUM Vacuum CLEARING BLOCKAGES - THERMAL CUT-OUT - Large items may block the tools or wand inlet. If this happens, do not operate the wand release catch. Switch 'OFF' and unplug, then remove blockage. • This machine is fitted with an automatically resetting thermal cut-out. If any part becomes blocked the machine may overheat and automatically cut-out. • Switch 'OFF' and unplug. Leave to cool down for 1-2 hours before checking the filter or for blockages. • Clear any blockage before restarting. • Clearing blockages is not covered by your warranty. LOOKING AFTER YOUR DYSON MACHINE • Do not use without the clear bin and filter in place. • Fine dirt such as plaster dust or flour should only be vacuumed in very small amounts. • Do not use the machine to pick up sharp hard objects, small toys, pins, paper clips, etc. They may damage the machine. • When vacuuming, certain carpets may generate small static charges in the clear bin or wand. These are harmless and are not associated with the main electricity supply. • To minimise any effect from this, do not put your hand or insert any object into the clear bin unless you have first emptied it and rinsed it out with cold water (see 'Cleaning the clear bin'). • Do not work with the machine above you on the stairs. • Do not put the machine on chairs, tables, etc. • Before vacuuming highly polished floors, such as wood or linoleum, first check that the underside of the floor tool and its brushes are free from foreign objects that could cause marking. • Do not push hard with the floor tool when vacuuming, as this may cause damage. • Do not leave the cleaner head in one place on delicate floors. • On waxed floors the movement of the cleaner head may create an uneven luster. If this happens, wipe with a damp cloth, polish the area with wax, and wait for it to dry. • Do not use this machine. Fine dust such as plaster dust or flour should only be vacuumed in very small amounts. Do not press the cyclone release button while carrying the machine, or it could fall and cause injury. Ensure the cyclone pack is secured to the machine. Do not shake the machine while carrying, or it could fall and cause injury. Keep hair and loose fabrics away from wand cap when machine is on. Use machine in bare floors mode for bare or delicate flooring, rugs, and carpets. Ensure the machine is in an upright position before adjusting the setting. After plugging machine into electric outlet, press on/off button A, push cleaner head down with foot and pull handle towards you. Brush control system Bare floors: Use this setting to stop brushbar from turning when vacuuming bare or delicate flooring, rugs, and carpets. Carpets: Use this setting so brushbar turns when vacuuming non-delicate surfaces. Tip The brushbar will not turn until you tilt the handle backwards to begin vacuuming. Consult your flooring manufacturer's recommended instructions before vacuuming and caring for your flooring, rugs, and carpets. Some carpets will fuzz if a rotating brushbar is used when vacuuming. If this happens, we recommend vacuuming in bare floors mode and consulting with your flooring manufacturer.
